The SAFARI Montage Endpoint is a high-performance solution capable of decoding live and on-demand video streams delivered via an IP network for High Definition (HD) display. This cost-effective digital media endpoint supports playback of SAFARI Montage licensed and district-created content, along with live streams such as school news, digital TV and live cameras. It integrates with Pathways SM.

SAFARI MONTAGE ENDPOINT OFFERS:

Push to Display

Allows teachers to show rich live video resources via the classroom display while continuing to use their workstation for other applications; No need to connect the teacher's workstation to a projector or audio system

PC and Laptop Input Switching

Use Pathways SM virtual remote control to switch inputs on IP-controllable projectors
